<b>OWT</b>	Ancestry.com, Per the Ancestry.com web-site: OneWorldTree takes family trees submitted by Ancestry members and "stitches" them together with family trees and historical records from other sources. OneWorldTree identifies probable name matches between these sources and displays consolidated results in a worldwide family tree that can help you with your family history research. Per Stewart R. Saylor: Use OWT data with caution and do not rely on OWT data only. If this data is for your ancestry, validation using other sources is critical. If the OWT data seems reasonable, I use OWT data to connect relationships for the purpose of future research.
